- **Available now at www.spacetalkwatch.com and at all JB Hi-Fi Australia stores for the Christmas sales, for \$349 plus a \$5.99 app monthly subscription fee**

Spacetalk Ltd. (ASX:SPA) (“Spacetalk” or “the Company”), developer of innovative technologies that keep families safe and connected, is pleased to announce the launch of the new Spacetalk Adventurer smartphone watch for children, and the new Spacetalk App for the whole family.

Spacetalk Adventurer

Spacetalk Adventurer is the Company’s next generation 4G all-in-one smartphone watch and GPS device for kids aged 5-12. Fun, fashionable, safe and technologically advanced, Spacetalk Adventurer is a totally new design build and technology platform, with exciting new features that deliver confidence for the child, enhanced controls for the parent, and new functionalities for the family to stay connected.

SPACETALK

Spacetalk Adventurer is purpose-built for children, incorporating major design, hardware and software engineering breakthroughs and enhancements into a high-quality device.

Spacetalk Adventurer's enhancements include:

- 4G mobile network connectivity. Customised and highly advanced 4G mobile antenna design that meets stringent 4G network band requirements for ANZ, UK and most of Europe, supporting 4G (LTE, VoLTE; 7 bands) and 3G (WCDMA; 3 bands). This is a significant and hard to achieve technology breakthrough for a wearable device, and makes it more efficient to roll out with mobile network operators as there is no need to make different variants for each

- Built kid-tough(er), with scratch-resistant safety gorilla glass and a hypoallergenic silicone band specifically designed to stand up to tough kid use
- IP67 water resistance
- Four on-trend speckled-finish body colours – midnight, coral, mist and ocean – able to be personalised through detachable interchangeable straps
- Largest capacity battery in the category – 750mAh
- Heart rate sensor, allowing for a new generation of health, fitness and emotional wellness features to be provided both on the watch and through the new Spacetalk App
- Hi-res 5MP camera
- Improved high accuracy GPS locator with licensed Google Maps™
- Large OLED screen with high brightness yet low energy consumption

Spacetalk Adventurer is available now at www.spacetalkwatch.com and at all JB Hi-Fi Australia stores for the Christmas sales, for \$349 plus a \$5.99 app monthly subscription fee.

New Spacetalk App

The new Spacetalk App released today with Spacetalk Adventurer replaces the AllMyTribe App and provides new functionality beyond parental controls. Every linked contact, regardless of device or age, can now stay connected in the more fun, engaging and secure Spacetalk ecosystem.

The new group Family Chat function allows families and other approved contacts to start or join group conversations using their Spacetalk devices¹ or any iOS or Android device, such as a tablet or phone, in the secure and private Spacetalk ecosystem. Kids with Spacetalk Adventurers can chat (and share recorded audio, videos and pictures) with other approved contacts that are either using their Spacetalk¹ or other devices. All conversations with the child's Spacetalk Adventurer can be monitored by the parent through the

¹ Family Chat is available now for Spacetalk Adventurer with linked contacts, with planned rollout to the existing Spacetalk Kids in Q3FY21 and Spacetalk Life expected in Q4FY21.

Spacetalk App, ensuring the appropriateness and safety of messaging between their children and others in their network.

The Company's Spacetalk Life smartphone watch (released in June this year), will also form a key part of this new Spacetalk ecosystem.¹ Like kids with Spacetalk Adventurer, seniors will be able to use their Spacetalk Life devices to chat with connected family and other members via Family Chat, either directly on their Spacetalk devices, or via the app on their mobile phone or tablet.

Other new Spacetalk App features include a range of new fitness, health and wellbeing tracking capabilities, such as Spacetalk Adventurer's new heart rate monitor, step counter, GPS and movement sensors. Engaging and useful, these features promote healthier living and, where relevant, a means of monitoring and sharing data with others such as a family doctor or health professional.

iOS and Android

The Spacetalk App works on both iOS and Android, ensuring all family members – parents, grandparents, extended family members and friends – regardless of whether they are iOS or Android phone or tablet users, can interact with linked Spacetalk device users.

New features will be released on an ongoing basis through automatic over-the-air software upgrades.

The Spacetalk App is available free. For device control functionality, a \$5.99 per month fee applies for Spacetalk Adventurer and the existing Spacetalk Kids device, or \$9.99 per month for Spacetalk Life.

The new Spacetalk App is anticipated to significantly drive user growth, creating an extended network effect for new user adoption.

Spacetalk CEO Mark Fortunatow said: "The launch of the new Spacetalk Adventurer and new Spacetalk App is a huge advancement for the kids connected wearables category, and our Company. It builds on what we have learned from the phenomenal success of the existing Spacetalk Kids device. We've evolved the Spacetalk ecosystem to now allow all family members, regardless of whether they are using one of our Spacetalk Family devices, a mobile phone or a tablet, or whether they are a 5 year old or 95 year old, to stay connected and safe."

This announcement has been authorized by Spacetalk CEO Mark Fortunatow.

About Spacetalk Ltd.

Spacetalk Ltd. (ASX: SPA) is an Australian Securities Exchange listed technology company that develops innovative technologies to enrich connections between families, schools and society.

Founded in 2001 as MGM Wireless, the Company developed the world's first SMS student absence notification platform for schools. MGM Wireless listed on the ASX in 2003 and went on to become Australia's most successful school messaging company.

Leveraging this history and deep understanding of school-with-family communication and student safety, the Company set out in 2017 to conceive, develop and launch a safe technology ecosystem for families. The market-leading Spacetalk range of all-in-one smartphone watches for children and seniors, and paired family app platform, are purpose built with tailored features, design qualities and data protection for families to stay confidently connected.

The Company changed its name to Spacetalk Ltd. on 12 November 2020.
